

## Earthquake Hazards Program

# Latest Earthquakes in the USA - Last 7 days

USA earthquakes with M1+ located by USGS and [Contributing Agencies](#).

## Instructions

- Click near an earthquake to zoom in.
- [Did You Feel It? - Report an earthquake](#)

## Tips

- To convert [UTC](#) to US time zones, see this [time zone list](#) or this [time zone table](#).
- Magnitude = ? for new earthquakes until a magnitude is determined.
- Maps show events recorded in the last 7 days with M1+ within the United States and adjacent areas.
- Maps are updated whenever a new earthquake has been located. Try to reload this page if you do not have the most current map.

## Earthquake Lists

- [USA M3+ Earthquake list](#)
- [USA M1+ Earthquake list](#)

## USA Regional Maps

- [Alaska](#)
- [California/Nevada](#)
- [Central & Southeast](#)
- [Hawaii](#)
- [Long Valley](#)
- [Los Angeles](#)
- [Northeast](#)
- [Northwest](#)
- [Parkfield](#)
- [Puerto Rico](#)
- [San Francisco](#)
- [Utah](#)
- [Yellowstone](#)

**DISCLAIMER** — The maps and lists show events which have been located by the USGS and contributing agencies within the last 7 days; considered to be complete lists of all events M1+ in the US and adjacent areas. The World Data Center for Seismology, Denver (a part of Earthquake Information Center) continues to receive data from observatories throughout the world for several months after the events occur; those data, adds new events and revises existing events in later publications. For a description of these later publications and the data available, see [Data](#).

## Earthquake Hazards Program

### Latest Earthquakes M3.0+ in the USA - Past 7 days

Magnitude 3 and greater earthquakes catalogued in the last week (168 hours) for the [ANSS US map area](#). (Some are obscured by later ones on the maps.) M4.5+ earthquakes are in red.

The most recent earthquakes are at the top of the list. Times are in [Coordinated Universal Time \(UTC\)](#). Click on the [MAP](#) in a two-degree tall map displaying the earthquake. Click on an event's "DATE" to get a detailed report.

**Update time = Thu Mar 4 0:52:16 UTC 2010**

## Earthquake Hazards Program

# Latest Earthquakes in the World - Past 7 days

Worldwide earthquakes with M4.5+ located by USGS and Contributing Agencies.  
(Earthquakes with M2.5+ within the United States and adjacent areas.)

Thu Mar 4 00:50:38 UTC 2010 376 earthquakes on this map

ages  
■ last hour   ■ day   ■ week

magnitudes  
□ >7   □ >5   □ >2.5   □ ? (not known)

### Instructions

- Hold your mouse over an earthquake to see its magnitude.
- Click on an earthquake for more information.
- Click on a location to go to a region map.
- [Did You Feel It? - Report an earthquake](#)

### Tips

- To convert [UTC](#) to US time zones, see this [list](#) or this [table](#).
- Magnitude = ? for new earthquakes until a magnitude is determined.
- Maps show events recorded in the last 7 days with M2.5+

### Earthquake Lists

- [M2.5/4.5+ Earthquake list](#)
- [M5+ Earthquake list](#)

### World Regional Maps

- [Africa](#)
- [Asia](#)
- [Australia](#)
- [Europe](#)
- [North America](#)
- [South America](#)

within the United States and adjacent areas, M4.5+ in the rest of the world.

- Maps are updated whenever a new earthquake has been located. Try to reload this page if you do not have the most current map.

- [South Pacific](#)
- [West Hemisphere](#)
- [East Hemisphere](#)
- [North Hemisphere](#)
- [South Hemisphere](#)

---

**ACKNOWLEDGMENTS** — [Collaborating seismic networks and data sources](#)

**DISCLAIMER** — The maps and lists show events which have been located by the USGS and contributing agencies within the last 7 days; considered to be complete lists of all events M2.5+ in the US and adjacent areas and especially should not be considered to be complete M4.5+ in the world. The World Data Center for Seismology, Denver (a part of the USGS National Earthquake Information Center) continues from observatories throughout the world for several months after the events occurred, and using those data, adds new events and revises later publications. For a description of these later publications and the data available, see [Scientific Data](#).

## Earthquake Hazards Program

# Latest Earthquakes M5.0+ in the World - Past 7 days

## Latest Earthquakes Magnitude 5.0 and Greater in the World - Last 7 days

[Versión en Español](#)

Magnitude 5 and greater earthquakes located by the USGS and [contributing networks](#) in the last week (168 hours). 1 above are in red. (Some early events may be obscured by later ones on the maps.)

The most recent earthquakes are at the top of the list. Times are in [Coordinated Universal Time \(UTC\)](#). Click on the 1 above to get a ten-degree tall map displaying the earthquake. Click on an event's "DATE" to get a detailed report.

Most recent earthquakes are at the [top of this list](#).

[Back to world earthquake map](#)

**DISCLAIMER** - The maps and lists show events which have been located by the USGS and contributing agencies within the last 7 days. considered to be complete lists of all events M2.5+ in the US and adjacent areas and especially should not be considered to be complete M4.5+ in the world. Beginning January 1, 2009, earthquakes outside the US below M4.5 are not reported unless NEIC obtains felt report: Center for Seismology, Denver (a part of the USGS National Earthquake Information Center) continues to receive data from observatorie for several months after the events occurred, and using those data, adds new events and revises existing events in later publications. Fo these later publications and the data available, see [Scientific Data](#).
