

Ages of some of the Hawaiian Islands and outer seamounts

Volcano Number	Volcano Name	Distance from Kilauea along chain (km)	Best K-Ar age (Ma)	Reference to Data Source (see notes)
0	Loihi	0	0	
1	Kilauea	0	0.4	
3	Mauna Kea	54	0.375 ± 0.05	1
5	Kohala	100	0.43 ± 0.02	2
6	Haleakala	182	0.75 ± 0.04	3
7	Kahoolawe	185	1.03 ± 0.18	3
8	West Maui	221	1.32 ± 0.04	4
9	Lanai	226	1.28 ± 0.04	5
10	East Molokai	256	1.76 ± 0.04	3
11	West Molokai	280	1.9 ± 0.06	3
12	Koolau	339	2.6 ± 0.1	4,6
13	Waianae	374	3.7 ± 0.1	6
14	Kauai	519	5.1 ± 0.2	7
15	Niihau	565	4.89 ± 0.11	8
15A	Kaula	600	4 ± 0.2	21
17	Nihoa	780	7.2 ± 0.3	9
20	Unnamed	913	9.2 ± 0.8	20
		930	9.6 ± 0.8	22
23	Necker	1058	10.3 ± 0.4	9
26	La Perouse Pinnacles	1209	12 ± 0.4	9
27	Brooks Bank	1256	13 ± 0.6	20
		1330	13 ± 0.6	22
30	Gardner Pinnacles	1435	12.3 ± 1	20
		1460	12.3 ± 1	22
36	Laysan	1818	19.9 ± 0.3	10
37	Northampton Bank	1841	26.6 ± 2.7	10
50	Pearl and Hermes Reef	2281	20.6 ± 2.7	11
52	Midway	2432	27.7 ± 0.6	12
57	Unnamed	2600	28 ± 0.4	11
63	Unnamed	2825	27.4 ± 0.5	11
65	Colohan	3128	38.6 ± 0.3	13
65A	Abbott	3280	38.7 ± 0.9	13
67	Daikakuji	3493	42.4 ± 2.3	14
69	Yuryaku	3520	43.4 ± 1.6	11
72	Kimmei	3668	39.9 ± 1.2	14
74	Southern Koko	3758	48.1 ± 0.8	14,15
81	Ojin	4102	55.2 ± 0.7	16

83	Jingu	4175	55.4	± 0.9	17
86	Nintoku	4452	56.2	± 0.6	16
90	Southern Suiko	4794	59.6	± 0.6	18,19
91	Central Suiko	4860	64.7	± 1.1	16

22. Garcia and Others (1987)

"Volcano Number" refers to the number in sequence along the Hawaiian Chain. Loihi, the youngest expression of the Hawaiian hotspot, is number 0; Kilauea is number 1, etc. Note that not all volcanoes are listed in the table (e.g. number 2 = Mauna Loa and number 4 = Hualalai). Also note that further up the chain, the numbering scheme becomes more subjective.
